Profile

I am a Business Information Technology graduate from Kerava.

I have been programming as a hobby for about ten years. Recently, I have focused more on full-stack web development using JavaScript and TypeScript.

In my free time, I maintain my own Linux servers, which I use to run my personal projects.Some of the projects can be found on my GitHub page and on my portfolio linked above.

I am eager to learn new things and pick them up quickly.

Work Experience

Experience in IT
